

Choosing Public Health: Testimonials

Asian Mental Health Access Project Evaluation:

“M·E·L worked with the team to help us to evidence the impact of the project. The evaluation produced strategic management actions, and has helped the project to identify and address improvements, and promote its strengths to mainstream funders.”

Jackie Latty, Coventry Primary Care Trust

Wolverhampton Domestic Violence Consultation:

“The Members of the Health Scrutiny Panel were impressed with the information M·E·L presented to them and the report produced. The Health Scrutiny Panel had also received evidence from a range of statutory and voluntary organisations and the consultation confirmed some of the issues the Panel had already identified, but enabled the Panel to take into account the views and experiences of service users.”

Fiona Bottrill, Wolverhampton City Council
